

An ISO 9001:2015 organisation

Precision. Performance. Protection.

Leading Indian manufacturer of glass fibre needle mats and advanced insulation materials since 2008.

ABOUT US

Established in 2008, GUJWOOL Glassfibre Composites has grown into a premier manufacturer of high-performance thermal insulation. We specialize in engineering materials that offer exceptional thermal stability and mechanical strength for extreme operating environments.

WHY PARTNER WITH GUJWOOL?

- ✔ **15+ YEARS OF EXPERTISE:**
Deep-rooted manufacturing experience in composite materials.
- ✔ **CUSTOM ENGINEERING:**
We don't just sell products; we develop solutions tailored to your technical requirements.
- ✔ **GLOBAL STANDARDS:**
Automotive OEM supply ready with export-compliant packaging.
- ✔ **VERSATILE APPLICATIONS:**
Catering to everything from industrial furnaces to aerospace heat shields.

CUSTOMIZATION CAPABILITY

Beyond standard rolls, we provide value-added processing:

- ✔ **PRECISION CUTTING:**
Die cutting and CNC profiling.
- ✔ **FINISHING:**
Aluminum foil facing and adhesive backing.
- ✔ **LAMINATION:**
Multi-layer composite lamination.

SUSTAINABILITY AND INNOVATION

We are committed to responsible manufacturing through:

- ✔ Binder-free production to eliminate toxic emissions.
- ✔ Energy-efficient production processes.
- ✔ Quality standards guaranteed

GUJWOOL CF-SERIES

(Compressed Felt - Fire Barrier Solution)

A heat barrier solution engineered to provide structural protection and thermal shielding. It maintains critical dimensional stability under direct heat exposure to act as a life-safety barrier.

TECHNICAL SPECIFICATIONS:

Material	Length
Glass Fibre	10 - 20 m
Thickness	Temperature Range
3 - 10 mm	230°C
GSM	
500 - 1500	
Width	
1.2 - 2.4 m	

KEY FEATURES:

- ✓ Excellent heat shielding properties
- ✓ Durable and easy to fabricate
- ✓ Suitable as heat protection liner

TYPICAL APPLICATIONS

Engine compartments

Generator enclosures

Fire-rated partitions

Industrial heat zones

STANDARDIZED TESTING & GLOBAL COMPLIANCE

Our materials undergo rigorous validation to ensure they meet the highest international safety and performance benchmarks.

✔ ASTM Standards

✔ EN Standards
(European Equivalent)

✔ ISO Test Methods

COMPREHENSIVE QUALITY ANALYSIS INCLUDES:

✔ Thermal Conductivity

✔ Tensile Strength

✔ Density Test

✔ Fiber Diameter Analysis

✔ pH Test

✔ Chloride & Sulphur Content

✔ LOI (Loss on Ignition)

✔ VOC Emission Testing

✔ Fire Resistance Testing
